Wave-Track 4

4-Button UHF Radio Keypad

features

- Rugged case
- Wipe clean keypad
- Standard 9V battery or plug-top PSU versions
- Portable or fixed
- Wall mount bracket included
- Flexible configuration options making it ideal for many applications
- Re-legendable buttons
- Messages programmable with PC app

Wave Track 4

The four button Wave-Track is ideal for many applications where members of staff need to be alerted using pre-formatted messages.

Each button on the wipe-clean keypad can be configured to transmit a pre-stored message of up to 21 characters. The keypad buttons also feature blank label areas which can be written on with a marker pen, making it ideal for shift workers or temporary event use.

Multiple Wave-Track's can be used on a site, each sending its own unique Identifier and text messages to the receiving devices, which could be pagers, fixed receivers or a combination of both. When configured to operate with fixed telemetry receivers (such as the Scope RX10) the Wavetrack can also be used as a remote control device.

This makes Wave-Track 4 incredibly versatile and suitable for a huge variety of applications, especially within the Hospitality, Retail and other customer service industries.

Wave - Track 4

SPECIFICATIONS

Power:
9V battery or 12V dc input

Current:
Transmit: <50mA @ 10mW
Sleep Mode: <20 uA

Operating Temp:
-30 to +50 deg C

Tx Frequency Range:
430 - 470 MHz

Tx Power:
10mW max

Channel Spacing:
12.5KHz @ 2.5 KHz deviation

Tx Baud:
512 / 1200

Protocol:
POCSAG

Footprint:
58 (W) x 130 (L) x 25 (D) mm
(excluding bracket)
Hole centres for mount
bracket: 75mm

Approvals:
CFR 47 Part 90
FCCID:JRNUSAWAVETRACK
EN 300 220, EN 301 489
