WLAN RADIO SYSTEM

Real-time Voice Communication Tool that

Tunnel Construction and Mining

The communication area can be flexibly expanded as the work progresses. In addition, the safety of the user can be confirmed by the Man down and Motion sensor functions.

Factories and Warehouses

The WLAN radio can cover all working sites, offices and remote bases through an IP network (VPN). Wherever you are in the network, you can share the information you need.

WLAN Radio System Features

Scalable System Using Wireless LAN Network

Deploying wireless access points over an IP network, the WLAN radio system can expand the communication range.

License-Free Communication

The WLAN radio uses common wireless LAN network frequencies, which do not need communication fees for running the system.

Communication with Dispersed Sites

When connected over an Internet VPN, the WLAN radios can communicate between dispersed sites.

Simultaneous TalkListen Function

The WLAN radio provides full duplex communication like a telephone conversation and one-to-many communication. TalkListen works with or without external headset.

Talk Listen
Simultaneous

Instantly Connects You with Your Team

Shopping Centers and Malls

By deploying access points along the IP network, the WLAN radio can communicate all the way from the basement to the top floor. Real-time simultaneous Talk and Listen is possible.

Hotel and Restaurant Management

You can use the WLAN radio as a handy communication tool between staff members. With optional Bluetooth® headset, VS-3, the WLAN radio can be used wirelessly and inconspicuously.
